Curriculum Vitae
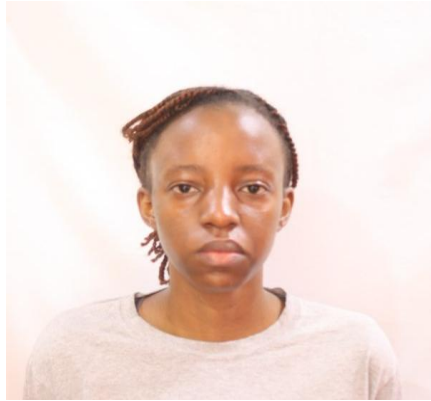

WENDY OKOTH

Profile
I am an Aspiring Full-Stack Developer with strong interests in backend development, block chain, and web technologies.
 I am also very eager to contribute to real-world projects and grow through hands-on experience.
I am also studying to become a credible accountant.

Projects

TukoPamoja DApp
Kenyan creators struggle with income, funding access, and platform fairness due to centralized systems and bureaucracy.This project introduces a decentralized quadratic funding protocol to empower creators through transparent, community-driven support

Mkulima Mkononi App
It is a digital AgriTech solution designed to empower smallholder farmers in Africa. It leverages Africa's Talking USSD and SMS APIs to provide accessible, timely, and personalized agricultural advisory services directly to mobile phones. The project aims to bridge information gaps, helping farmers make informed decisions and improve productivity

Interests

- Building websites and backend systems
- Learning emerging technologies (AI, Blockchain)
- Working on open-source and collaborative projects
